Slides in the Clouds

All the ways that your presentation files can find homes online

Monday

11:15am

GEETESH BAJAJ

Everyone wants to share PowerPoint slides in much the same way that people share videos on YouTube. This session introduces you to the concepts of slide-sharing in simple everyday language (starting with this whole “in the cloud” business). Topics to include:

- Do you need to share your slides?
- What are your slide-sharing options?
- Can you share a hundred slide decks at once?
- What are the side effects of sharing?

This session is for those who create or deliver presentations and want to share their slide decks in editable or non-editable form.
