

MONDAY ♦ 9:45am
TOOLS & TECHNIQUES

Five Favorites

The first in a series of favorite techniques and secrets from our team of experts

GLEN MILLAR

One of the fastest ways to learn new techniques is to see them performed by the very high-end users. This first in the series promises to make your head spin as only Glen can do. His tips routinely compel his fellow presenters to start frantically taking notes. And we would normally give you some idea of what Glen will be covering, but we have learned over the years that it's best to not know! When we allow him to use his imagination, often right up until the day before, amazing things happen. If you see him the evening before and offer to buy him a beer, he will quite likely give you a hint...

This session is for PowerPoint users who want to discover some of the advanced techniques and secrets in PowerPoint.
