# Migration

Is it time for you to make the move?  
If so, how, and to where??

## GROUP DISCUSSION LED BY RICK ALTMAN

Here it is 2009, our fourth conference since we first saw Version 2007 in action, and we have just now crossed the threshold where even 50% of our patrons are using it. What are the factors contributing to this type of inertia? And as we discuss whether it is time for Version 2003 users to upgrade, we have to ask: upgrade to what? After all, Version 2010 is now on our radar. We know how companies agonize over decisions like this—that is why there are still a few of you using Version 2000!

This group discussion will address these questions and issues and attempt to help all patrons set a smart and responsible migration path for their future. Bring your questions, your concerns, and your fears.

*This group discussion is for anyone with upgrade questions and concerns.*
