

Spotlight on PowerPoint 2010

Our team's favorite new features of the new version

ECHO SWINFORD

PowerPoint 2010 is a huge leap forward from previous versions, but lots of cool, useful stuff gets lost in the marketing shuffle. This two-part session will highlight new features we think you will love but may not have seen in action yet.

Deciding whether to upgrade? Wondering if your top request made it into the product? Bring your questions and we'll answer them. While these will be interactive sessions and your questions will take center stage, here is what is expected to be covered:

Part 1

- Presentation Sections
- Animation Painter
- Picture editing tools
- Combine Shapes commands

Part 2

- Customizing the Ribbon
- New transitions
- Broadcast Slide Show
- Save as Picture Presentation
- Review tools

These two sessions are for anyone interested in learning more about PowerPoint 2010. Please note that we are devoting an entire hour on Wednesday morning to PowerPoint's new video-handling capabilities. Therefore, that feature will not be covered prominently in these sessions.
