

Your Very Own Smart Art

When the perfect graphic doesn't exist

WAYNE MICHAEL

What if you have devised the most ingenious example for your PowerPoint presentation but it is so unique and clever that no clip art, photo or graphic exists that will do it justice? What do you do, give up? Settle for something less? Go back to school and become an art major? Believe it or not, PowerPoint can help you create your own smart art and save the day. In this session we will show you how, with the following topics:

- The Drawing toolbar, object grouping, and the “Save as Picture” secret
- Do you watch Wheel of Fortune? What is the “RSTLNE” of your personal smart art library?
- Unsuspended animation
- Trigger happiness can be a good thing

This session is for everyone who is not Leonardo Da Vinci or Walt Disney...or anyone who has a good story to tell but lacks the artistic ability to illustrate that story.
